

Bus Evacuation Drill

The Transportation Department will send out the Bus Evacuation Drill form to the schools by the first day of classes.

This is the drill to be used in the event of emergency situations. Principals, teachers, coaches and parents are all welcome to participate.

The drill is to be completed at the school by the third Kindergarten day of the school year and signed off by the principal. It is important that the drill is conducted on a Kindergarten day when the newest students are riding the bus. The drill will be conducted by the bus operator. Drivers will do a front, back and downed power line bunny hop evacuation. It is important that if there is an emergency where an evacuation is necessary, everyone knows what to do. This reduces the panic response and gives people something to focus on.
